

NEW YEAR MESSAGE

Dear Colleagues,
Happy New Year 2022!

The year 2021 was a rollercoaster ride for all of us. The second wave of coronavirus swept the whole world. Unfortunately we also lost six of our valued colleagues. A number of employees and their families fortunately also recovered from the attack of corona virus. Your organisation stood by you and your family during the time of crisis and will continue to do so with renewed zeal and commitment to your safety and health.

Despite disruptions and uncertainties, we completed R, M&U works of Unit# 6 of HHEP, Burla with upgraded capacity of 43.65 MW. R&M work of Unit#2(60 MW) of BHEP, Balimela was also completed. Our contributions by ensuring supply of reliable, cheap and clean power to the grid particularly during peak shortage have been well recognised and duly appreciated. During the Calendar year 2021 OHPC Power Stations generated 5057 MU of energy. The achievements made during the year could not have been possible without your tireless efforts.

With threats of OMICRON looming large, all of us need to observe COVID appropriate behaviour.

The New Year opens up great challenges ahead and we need to align our self with changing energy scenario towards renewable energy and energy storage. Let us move forward collectively with a deep sense of purpose in line with organisation's objective and bring about transformative changes.

I pray the New Year brings lots of joy and bundles of cheers to all my treasured employees.

Best of Wishes Once Again!

Amresh Kumar
